SINCE
1909

TRANSFER SWITCHES

Manual switch gear for portable generators and other back-up power sources.

THE LEADING BRAND IN
PORTABLE POWER TRANSFER EQUIPMENT

A photograph of a large, modern industrial building with a light-colored facade and a dark horizontal band. The word "RELIANCE" is mounted on the building in large, white, three-dimensional letters. The foreground shows some greenery and a clear sky.

RELIANCE

A photograph of a factory interior, showing rows of workbenches, shelving units, and various electrical components and materials. The scene is brightly lit, and the overall atmosphere is one of active manufacturing.

ELECTRICAL INNOVATION
SINCE 1909

Reliance Controls Corporation has been manufacturing high-quality electrical products since 1909. We have built a strong reputation not only for the quality of our products, but also the manner in which we conduct our business. We strive to exceed the expectations of our customers.

Reliance introduced the first two transfer Switches engineered specifically for portable generators in 1983. Today we offer over 500 manual transfer Switches, transfer panels and generator-

ready load centers. Added to this offering is a broad selection of accessories including power inlet boxes, generator cords, wattmeter boxes and wiring devices. Reliance is the leading manufacturer of manual transfer equipment for portable generators.

We continue to broaden our line with innovative products of exceptional quality.

All Transfer Switches in this catalog are listed by Underwriters Laboratories Inc. and are suitable for use in accordance with article 702 of the National Electric Code ANSI/NFPA 70.

Product is made from metal

Product is made from ABS plastic

Cord has completely sealed (non-removable) molded plug & connector ends

Cord has assembled (removable) plug & connector ends

Product is made from Powder Coated Steel

Product is weather proof / NEMA 3R Rated

Product is made from a high-impact UV-Coated plastic

6-gauge conductors

10-gauge conductors

12-gauge conductors

Product has a turn-to-lock connection type

Product has a straight-blade connection type

* Models come factory wired with a combination of 120V and 240V circuits

KEEPING YOUR HOME POWERED UP WHEN YOU NEED IT MOST

PRO/TRAN[®] 2

Reliance Controls' new Pro/Tran2[®] line of Loadside[™] transfer Switches features all the benefits which made the original Pro/Tran[®] an industry-leading product for over 30 years, while incorporating a number of new features to give our customers exactly what they are looking for.

All models are suitable for use with any UL Listed 1-inch interchangeable circuit breaker. They are UL Listed for all popular brands and

types of breakers, including AFCI and GFCI. They can be easily re-configured in the field for multiple double-pole circuits if needed. All models include a swing-up protective cover which provides a finished appearance. Optional new color-coded watt meters are included on many models and assist in balancing the generator load. Like all Reliance Pro/Tran[®] transfer Switches, the Pro/Tran2[®] is completely pre-wired for fast installation.

The Pro/Tran2[®] series is UL Listed to Standard 1008 and is suitable for use in accordance with Article 702 of the National Electrical Code ANSI/NFPA 70.

Cover included to protect toggle Switches and circuit breakers.

New color-coded watt meters to help balance generator load.

One-inch circuit breakers make changing circuit sizes simple.

Please note:
A & B circuits MAX 30A, all else MAX 20A

COMPLETELY
PRE-WIRED

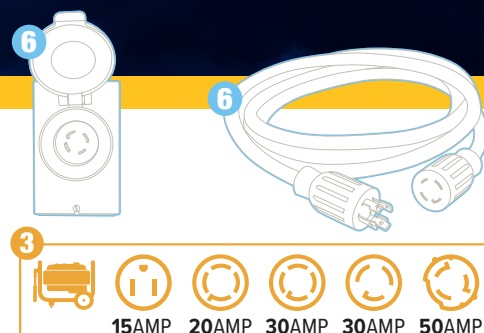

TO INSTALL QUICKLY ON
THE LOAD SIDE OF YOUR
ELECTRICAL PANEL

- Completely pre-wired for easy intallation
- Eliminates the danger associated with back-feeding
- Meets all requirements of article 702 of the national electrical code

With a Reliance Controls Transfer Switch: When the Power Goes Out:

- 1 Connect your portable generator to the power inlet box with a Reliance power cord.
- 2 Start up your generator.
- 3 Flip the Reliance transfer switch toggles from the LINE to the GEN position and enjoy the convenience of restored power to your key appliances.

FIVE SOLID REASONS WHY PRO/TRAN® 2 IS THE ONLY LOGICAL CHOICE

1) LOW COST.

Surprisingly low. A fraction of the cost of a DPDT switch, subpanel, power inlet, fittings, conduit, circuit breakers and wire. Pro/Tran 2 transfer Switches combine all these elements in a single, compact, ready-to-install unit.

2) FAST INSTALLATION.

Extremely fast. That's because every Pro/Tran 2 transfer switch is completely prewired. Simply attach the conduit, mount the cabinet, make the necessary connections in the load center and it's ready to use.

3) SAFE OPERATION.

Ultimately safe. The double-throw, break-before-make switch action of each Pro/Tran 2 circuit keeps the generator isolated from the utility at all times. This eliminates the danger of backfeeding the utility and causing injury to repair crews as well as preventing utility power from feeding into the generator and causing damage or personal injury.

4) EASY TO USE.

Remarkably easy. Plug the generator cord into the Pro/Tran 2, or the optional power inlet box, start the generator and move the Switches on the Pro/Tran 2 from LINE to GEN. Now you have power to your critical circuits.

5) EXCEPTIONAL QUALITY.

Quite Exceptional. Every Pro/Tran 2 component is manufactured to exacting specifications and tested before assembly. Each completed Pro/Tran 2 is thoroughly tested before shipment from the factory. This exceptional level of quality is backed by an exclusive five-year limited warranty.

Your generator was designed to power much more of your home than extension cords can connect. A generator's 20, 30 and 50 amp receptacles were designed specifically to connect to your home via a transfer switch.

A transfer switch is the ONLY safe way to harness your generator's power and conveniently control each of the home circuits you will need in an emergency.

Easy/Tran Furnace Transfer Switches

The Easy/Tran TF transfer switch is designed for the control of a single circuit, such as a forced-air furnace, in the event of a power failure. The attached 18" flexible aluminum conduit is pre-wired and allows the TF to be easily connected at the circuit breaker panel or the furnace or at any point in between. Power can be supplied from a portable generator, inverter, RV generator, fuel cell or any standby source capable of producing sufficient current to operate the desired load. Uses standard grounded extension cord.

FEATURES

- Completely pre-wired for easy installation
- Eliminates the dangers associated with back-feeding

EASY/TRAN TRANSFER SWITCHES

BACK-UP POWER / TRANSFER EQUIPMENT

Easy/Tran Transfer Switch for Single-Circuit Control

The Reliance Easy/Tran transfer switch is easy to install and easy to use. It is ideal for single-circuit control of farm buildings, irrigation systems, community wells, telecommunication substations, traffic signals, commercial garage doors, cell towers, sewer and water lift stations, septic pumps, industrial sump pumps, electric water heaters, electric heat and much more.

Signa Series Transfer Switches

The “Signa” Series is available in 20A to 50A Models and is designed specifically for traffic signal applications, with an insect-resistant outdoor stainless steel cabinet. The manually operated “toggle type” transfer switches can be switched to utility power in fewer than 250 milliseconds, permitting the traffic signals to operate normally, without interruption, during the transfer to utility power.

C20A
Signa Series
Transfer Switch

FEATURES

- Completely pre-wired for easy installation
- Stainless steel NEMA 3R lockable cabinet

The Raintight NEMA 3R power inlet box is designed for use with any transfer switch, generator-ready load center, as well as many stand-alone applications. The power inlet box is usually installed outdoors, in an area where the generator is being used. Using one of the four combination 1/2-inch and 3/4-inch knockouts (One on each side, bottom and back) the power inlet box can be wired directly to the transfer switch or panel. The exclusive patented design provides generous wiring space and facilitates wiring in.

PR-Series Power Inlet Boxes

The PBN Series features an exclusive POP-FAST™ 3/4" knockout design that makes for exceptionally fast installation. The interior provides over 100 cubic inches of wiring space. The slide-out base permits easy 360° access to the terminals of the flanged inlet for fast wiring. The through-bolt design is held in place with two 4-1/8" JS500 screws. A water-resistant and bug-proof inlet cover comes standard on all models.

PK-Series Power Inlet

Model#	Rating, VAC	Config	Max. Gen. Input	Dimensions (H x W x D)	Shipping Wgt.	UPC
PK20	20A @ 125/250V	L14-20	5kW	3 x 3 x 2	1	8-15181-01011-9

Complete turn-key kit has everything needed to make a professional transfer switch installation in a home or office, enabling the wiring system of the building to accept the full power of a portable generator to run multiple electrical appliances and devices during a power outage. For generators with NEMA L14-30 or L14-20 power outlet. These kits are packaged in vivid 4 color retail packaging and include our industry leading 30A 6-circuit or 10-Circuit prewired loadside transfer switch with built-in wattmeters, 30A outdoor power cord inlet box, 30A 10-foot generator power cord w/ L14-30 molded ends and all required wire connectors. Reliance Controls transfer Switches are cULus1008 Listed, assembled in the USA and carry a 5-year warranty.

Transfer Switch Kits for Non-Retail Environments

Provide fast, safe and easy connection of emergency power to a home, office, store or farm. These manual transfer switch kits are designed specifically for the professional electrician. Each kit provides everything needed to connect any generator with a 125/250VAC 20A or 30A locking outlet to a residential or light commercial load center. These kits include a six- or ten-circuit Pro/Tran2 manual transfer switch, a 30A, 125/250VAC power inlet box, a 20-foot, 30A, 125/250VAC outdoor rated generator cord and wire connectors. The non-metallic power inlet box version is perfect for coastal areas where salt air is an issue. Reliance Controls transfer Switches are cUL1008 Listed, assembled in the USA and carry a 5-year warranty.

PANEL/LINK®

MANUAL TRANSFER PANELS & GENERATOR-READY LOAD CENTERS

Heavy-duty manual transfer equipment for portable generators to 30kw.

NO POWER? NO PROBLEM!

WE'VE GOT YOU LINKED UP

TCA SERIES

MANUAL TRANSFER PANELS

The Panel/Link TCA circuit breaker combinations of 30A-125A utility and 30A-100A generator. The interlinked circuit breakers keep the generator isolated from the utility at all times, even with the dead front removed. The TCA features a heavy-duty bus. The TCA is suitable for service entrance and may be used as a main panel for a single load or to feed a sub-panel. Available in indoor and outdoor enclosures, the TCA has no provisions for branch circuit breakers.

- G. 3 K.O.s for 1.75" Ground Bar Mounting
- H. Mounting Hole (4 places)

Outdoor TTH Series

- A. HS Type Hub Opening (Max. 2.5" Conduit)
- B. 1 K.O.s for 1", 1.25", 1.5", 2", 2.5" Conduit
- C. 4 K.O.s for 5", .75", 1" Conduit
- D. 12 K.O.s for .5", .75" Conduit
- E. 1 K.O. .25"
- F. 3 K.O.s for .5" Conduit
- G. 3 K.O.s for 1.5", 2", 2.5" Conduit
- H. Embossed .5" Mounting Hole (4 places)

TTH Series Wiring Diagram

Above models are UL listed for the following branch circuit breakers: Siemens Type QP, QT, QPH, HQP, QPH, QPHF, QFP, QE, QEH; Square D Series HOM 100A Max. Murry Type MP; C-H/Westinghouse Series BD, BR, BQ, GFC 100A Max.

TTV SERIES

MANUAL TRANSFER PANELS

The **Panel/Link TTV** includes a 150A - 200A main circuit breaker interlinked and a 30A - 125A generator circuit breaker. The interlinked circuit breakers keep the generator isolated from the utility at all times, even with the cover or deadfront removed. The TTV features a heavy-duty copper bus. The TTV is suitable for service entrance and provides for 36 branch circuits. Dual wattmeters, for balancing generator load, are optional.

CIRCUIT TESTERS & HOME MONITORING PRODUCTS

By listening to our customers as they prepare and react to power outages, we've developed this innovative group of electrical **CIRCUIT TESTERS**. We designed them to make generator transfer switch installation as well as everyday electrical jobs easier and safer.

Our storm-related **HOME MONITORING PRODUCTS** warn you of power outages and home flooding, alert you to accidental power interruption to important plug-in devices and even phone you anywhere if the temperature in your home or cabin approaches freezing.

CIRCUIT TESTERS

Volt Snooper Non-Contact Voltage Detector

Item#	Description	UPC	Pack Qty.
THP101	Non-Contact Voltage Detector	8-51890-00001-0	10

- Handy pen-size device checks for the presence of live voltage between 50- 1000 AC Volts (50- 60 Hz) without need to contact bare wire leads.
- Visual and audible signal indicates current.
- Pushbutton activation of voltage detection.

Circuit Scout Circuit Breaker Locator

Item#	Description	UPC	Pack Qty.
THP109	Circuit Breaker Locator and Wiring Analyzer	8-15181-01277-9	5

- Electrician-inspired plug-in device for detection of the right circuit breaker the first time, every time.
- Plug the Circuit Scout into the outlet you want to trace. Turn on sonic and increase volume as needed. Then go turn off the correct breaker to stop sonic.
- Eliminates need for a second person on the job.
- Built in wiring analyzer.

Circuit Screamer Circuit Breaker Finder Plus

Item#	Description	UPC	Pack Qty.
THP109MA	Circuit Screamer	8-15181-01993-8	5

- Electrician inspired.
- Plug into live outlet. Locator screams at 105 dB until correct circuit breaker is turned off. Adjustable volume.
- No need for a second person at load center.
- Comes with standard screw-in socket adapter for ceiling lights - to trace wall switches.

PowerOUT! Power Failure Light And Alarm

Item#	Description	UPC	Pack Qty.
THP207M	Power Failure Emergency Light & Alarm	8-51890-00062-1	5

- A compact plug-in emergency light and alarm. Under normal utility power conditions the PowerOUT is a subtle night light. But when a power outage occurs, it becomes a 78dB alarm with a powerful LED path- or portable flashlight that lasts up to 3 hours.

SoniCord Key Appliance Power Failure Alarm

Item#	Description	UPC	Pack Qty.
THP111	Plug-In Appliance Load Tester	8-15181-01056-0	3

- Essential for monitoring Home Freezers, refrigerators, aquarium and other key home appliances. Plugs in-line between the power outlet and the appliance being monitored. Sounds piercing signal for 90 minutes to warn you a power failure has occurred. Two rechargeable batteries included.

& HOME MONITORING PRODUCTS

Early Warning Sump Pump Alarm & Flood Alert

Item#	Description	UPC	Pack Qty.
THP205	Sump Pump Alarm and Flood Alert	8-51890-00061-4	5

- This alarm sounds an extra-loud 105dB alarm when water in a sump pump crock rises above a level you set. Accessory floor sensor for laundry rooms.
- Features include**
- Wall-mountable
 - 6-foot sensor probe wire with crimp-on sinker weight to allow sensor to hang in sump crock at correct level.

Detects Unwanted Water or Flooding Loud 105dB Siren

AmWatt Plug-In Appliance Load Tester

Item#	Description	UPC	Pack Qty.
THP103	Plug-In Appliance Load Tester	8-51890-00004-1	3

- Instant reading of either Watts or Amps used by any plug-in device.
- Determine the wattage rating you'll need from a generator in a power outage.
- Plug AmWatt into a 120 Volt live outlet. Plug your appliance into AmWatt. Read watts (up to 1875) or amps (up to 15) on LCD display.

26IN CORD C UL US LISTED Rugged, high-impact construction

PowerBack Utility Power Return Warning Alert

Item#	Description	UPC	Pack Qty.
THP108	Plug-In Voltage Indicator	8-15181-01055-3	1

- PowerBACK connects to your main electrical panel to alert you when utility power returns after a power outage. For use when entire panel is shut down while a generator is used.

C UL US LISTED Loud 100dB Siren

CheckOut PLUG-IN CIRCUIT ANALYZER AND GFCI CHECK

Item#	Description	UPC	Pack Qty.
THP102	Plug-In Circuit Analyzer and GFCI Check	8-15181-01066-9	5
THP102P	Plug-In Circuit Analyzer and GFCI Check 40 in. Cord for remote readings.	8-15181-01067-6	5

- Plug CheckOUT or CheckOUT PRO circuit analyzers into 120 Volt standard or GFCI outlet. LCD light pattern indicates any wiring flaws. Push button for GFCI check.

40IN CORD C UL US LISTED

P/VI Plug-In Voltage Indicator

Item#	Description	UPC	Pack Qty.
THP105	Plug-In Voltage Indicator	8-51890-00056-0	5

- Plug PIVI into any home or portable generator outlet. Read the voltage level output on the LED lights
- Voltage Readings: RED- Too High (over 132 Volts) = can damage home devices; GREEN- Good (108-132 Volts) = home devices are safe; AMBER- Too Low = can damage home devices.
